

We employ only the most qualified people and give them all of the materials, equipment and freedom necessary to meet the complex construction requirements and rigid schedules of each project. We realize that the key to our success is our people. Our project managers receive extensive supervisory, code, safety and job specific training. In addition, each of our equipment operators is well trained and completely understands his enormous responsibility on the job site.

Our safety director conducts weekly tool box safety meetings at each job site and coaches each crew in project specific hazard avoidance and safety. All new employees receive comprehensive safety training. We also conduct random drug testing of all employees. We are convinced that a safe and drug free work place environment is crucial to quality and cost effective construction. And our safety record backs up this commitment.

Our equipment fleet, which we are steadily expanding, in number, size and capacity, maximizes our flexibility in the variety of jobs we can do as well as our capabilities at providing our customers with the latest and most productive construction techniques in the industry. And, our preventive maintenance program contributes measurably to overall job site productivity and safety.

Our grading crews operate state-of-the-art robotics technology systems which contribute significantly to job productivity and efficiency: our rotating lasers help us maintain grade integrity for large areas on job sites that require the same grade, such as building pads, and our GPS systems help us with multiple grades, such as parking lots, and speed up job production while keeping engineering costs down for our customers.

We are proud of our team of professionals and the respect we've earned from our customers. MDX has a strong track record of finding innovative ways of solving complex problems and improving the quality of our construction capabilities. We are also committed to making sure that each site solution is practical and cost effective. We value the continued confidence and trust of our customers. We know that our professionals will live up to our reputation for quality and innovative site development and utilities construction.

Whether we are clearing and grading a site for a new school or excavating for an addition to an industrial complex, we are committed to providing all the personnel, equipment, resources, knowledge and experience necessary to produce the highest quality of work. We work with a wide range of general contractors, commercial and industrial owners and developers and government agencies in the Greater Cincinnati area. We effectively serve our clients by exercising the same attention to detail that ensures a superior product at the best possible cost, on each project.

MDX has built a strong foundation and a solid reputation for quality and dependability. We have successfully improved infrastructure for commercial, industrial, municipal and state development projects. Our construction focus includes:

- Private and public elementary, middle and high schools
- n Sports and recreation facilities
- n Restaurants and retail centers
- n Commercial office campuses
- n Manufacturing and distribution complexes
- n Churches
- n State, county, municipal and township buildings and centers

Our project managers and field crews bring an abundance of experience and skills to each project. As a result, we are able to provide our clients with comprehensive and cost efficient services, from preconstruction planning through completion, including:

- |  |  |
|--|--|
| ■ Clearing and grubbing                      | ■ Demolition                           |
| n Grading and excavation                     | n Storm drainage and detention         |
| n Domestic water, gas and sanitary utilities | n Fire protection                      |
| n Paving, curb and gutter                    | n Building pads                        |
| n Erosion control                            | n Site finishing, clean-up and testing |
